

Position: Software front end UI/UX developer

Sensible is a sustainability tech company based start-up in Vancouver, Canada, developing innovative technologies to integrate occupancy dynamics for smart and sustainable buildings. If you are an ambitious and creative designer, then check out our new UI/UX position. You'll be working with bright minds at our company, and with our research partners at UBC computer science.

Requirements:

You should have the ability to help with:

1. Continued product design and development
2. Lead, with supervision, the development of new Web applications
3. Optimize front-end usability & visualizations (front-end developer with some backend work)

Required skills:

- Experience with at least one modern front-end framework/library (e.g., React, Angular.js, Redux, Vue.js, Ember, etc.).
- Familiarity with D3js (or other data visualization libraries).
- Experience with HTML5 and CSS3.
- Familiarity consuming RESTful APIs.
- Basic Git knowledge.

Additional beneficial skills or experience:

- Familiarity with SPA (single page application) development.
- Strong JavaScript development skills.
- Previous experience using Python/Django Rest Framework is a nice plus.
- Familiar with workflow tools (e.g., Gulp, Grunt, Broccoli).

Pay: Part time or full time employment at a competitive hourly rate.

Job Description: You will be working under supervision of our technical, lead developer, support and develop production-ready software. You will work closely with clients to continuously improve the functionality and user experience of the application. In addition to development, client support and coordinating with technical members of our partners will be required.

Benefits:

- Flexible schedule and work-environment
- Interesting, varied and challenging work
- Work on a product that is good for the environment

Apply by Aug 31st, 2017: Please apply in the career section of our website at sensiblebuildingscience.com. Specify you are applying for the Front End UI/UX Dev position in the subject field

About Sensible Building Science: Sensible Building Science, founded in 2014, is a Vancouver based company with a focus on applications for sustainability. We welcome candidates who share our values and want to work on projects that benefit society and the environment.
